

Transform study success with a DCT partner

Boost your results & capability to deliver hybrid & home trials with **Europe's 1st independent dedicated DCT network**

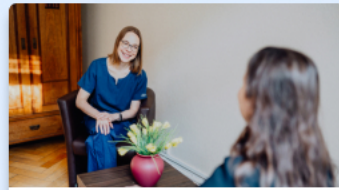

Embrace the future of clinical trials

Access larger & more diverse patient populations

Streamline process with home & hybrid digital trial design

Boost patient retention with experienced home care services

Ensure patient safety & data integrity with your DCT partner

Did you know? The DCT Market is set to hit \$1.63 billion by 2027 with Europe showing the fastest growth

Trust your DCT Toolkit & Framework

Equip yourself with the tools, teams & support you need to safely deliver quality trials at home - on time, on budget

Homecare

Award winning home care nurse network & central project team

Experienced PI & SI Network

Home sampling & direct-to-patient supply delivery

Tools & Support

Patient training of wearables

Telemedicine & eConsenting

EMR, eSource verification & digital reporting

Engagement

FutureMedsGO mobile research unit

Fully trained patient support centres

Social media campaigns & patient insight

Expand your reach with Europe's 1st Independent DCT Network

Connect to 20 dedicated research sites and 1200+ trained home care nurses across 18 countries

 Dedicated Research Site

 Home Care Service reach

Latest Case Study:

Relapsing Multiple Sclerosis Study (HCV)

Patient population: Adults

Number of sites: 70

Duration: 3 years (ongoing)

DCT Activity: Blood draw, processing, supply shipment, general assessment, IMP administration, Patient Diary Review, Data Collection, ECG, Spirometry

93

Patients on trial

8

Countries covered

80

Trained nurses

970+

Homecare visits

*Study-specific activities defined in the protocol and in line with local regulations, under pre-defined PI oversight
